

# The Ultimate Kite Show

## With Peter Lynn

### Background

For more than 3,000 years, kites have been flown to delight and entertain children of all ages. They have also been used for practical purposes such as fishing, measuring distances, man lifting, signalling, and communication. However, **until now** kites have always required wind. **The Ultimate Kite Show** allows kites to be flown over water in a **stunning display** in no wind at all.

### Company Profile

**The Ultimate Kite Show** is a dynamic new specialised entertainment and promotional marketing company set up to provide professional displays on the ocean, harbour or beach. Our unique display, using very large 3-dimensional creature and sea themed kites, launched from and towed by powerboats and jet skis, provides an impressive visual spectacle, stand alone or as a support for existing events.

**The Ultimate Kite Show** can provide, to name just a few, octopus, lobsters and manta rays floating in the sky amidst huge fish, divers and sharks. We look to serve tourist authorities, sporting events, sailing regattas, and individual water side businesses and aim to put on an **impressive show** throughout the day. **A show that will be remembered for a lifetime.**

Subject to timing, we can make bespoke kites, banners or streamers with or without logos and slogans to suit. Just let us know what you want and we will rise to the occasion.

**The Ultimate Kite Show** has been set up by four long term dedicated kite flyers and business people who between them have nearly 100 years kiteflying experience. Before coming together as **The Ultimate Kite Show** our founding team have all been involved in the kite world in various capacities: design, display and organisation. We now look forward to using our skills, experience and new technology to entertain and amaze large audiences around the world. At long last our **spectacular kite shows** can be seen irrespective of the wind conditions and free from requirements for large areas of land. For the first time in history kite shows are able to be scheduled in the same way as fireworks or other entertainment.

# The Ultimate Kite Show – Who we are

**Peter Lynn** Peter Lynn is a world famous New Zealand kitemaker, engineer and inventor. He has been making and flying kites for over 35 years. He is noted for developing huge themed (often sea creature) single line show kites that are the mainstay of International Kite festivals the world over.

He has also made enormous contributions to the development of power kiting and kite surfing.

Peter is unique in the scale and breadth of his contribution to kite flying. A pioneer of kite surfing, the inventor of kite buggying, world leading in the emerging field of kite sailing and the world's number one single line kite maker.

Peter and his awesome kites are in such demand at kite festivals around the world that he spends six to eight months a year travelling. He has designed the last five kites to be awarded the Guinness World Record for biggest kites in the World and has had numerous honours and awards bestowed on him.

**Paul Reynolds.** Paul is from London, England and has been flying kites for over 20 years. He has represented his country at World Championship Level and was responsible for founding the International Rules Book Committee and implementing much of the current structure around sport kite flying today. With his wife, who he met through kiteflying, he is an avid collector of single line kites.

He is most often seen at kite festivals talking. His knowledge of kites, kitefliers and enthusiasm for kiteflying has led him to being one of the most well know commentators at kite festivals around the UK and at various events around the world. He has commentated at kite festivals in America, Holland, New Zealand and Malaysia.

Paul is a member of the Institute of Directors and when not flying kites works for a specialist wealth management firm advising ultra high net worth individuals and families.

# The Ultimate Kite Show – Who we are

**Abdul Rahman al Farsi.** Abdul Rahman is a businessman from Kuwait with a passion for flying big kites. He holds the current Guinness World Records for the biggest kite thanks to his amazing kite in the form of the

Kuwait national flag (see picture left). This was made and designed for him by Peter Lynn.

It is a staggering 42-meters wide and 25-meters long, nearly as big as an Olympic swimming pool. Using 2500 sq meters of specially reinforced fabric and weighing 200kgms, the mass of air inside this kite when flying is a mind blowing 5 tons.

Earlier this year Abdul Rahman al Farsi arranged the Kuwait International Kite Festival where similar kites for America and Japan joined his in the sky over Kuwait City.

**Stefan Cook.** Stefan has flown sport, power and display kites through out New Zealand from a very early age.

His passion and knowledge for kites lead him into a professional kiteboarding carrier where he's competed in, and won, kiteboarding events throughout Europe and Australasia. His skills were quickly noticed by a leading kite manufacture, and for the previous eight years he was based in Holland and England to promote kiteboarding products. He also managed a professional kiteboarding team and played a large part in the production of kiteboard kites from development to consumer delivery.

He's currently developing a side venture that manufactures the world's only commercial kite-powered sailing boat. His traveling journey has brought him to every continent to kiteboard professionally and for enjoyment.
